The Garden in May

LIBRARY

JUL 12 1928

U. S. Department of Agriculture

If you don't grow vegetables in your garden, Mother Nature will grow weeds. The ground is always busy, so why not let it grow something useful.

Plant Beans every two weeks for a continuous fresh supply and for next winter. A plentiful supply of Beets, Carrots, Parsnips and Salsify should be grown to put away for next winter. This is Late Cabbage planting time and for planting the vine crops like Cucumber, Cantaloupe, Watermelon, Pumpkin and Squash. Put in Garden Corn to have plenty of "corn on the cob." No Southern table is quite complete without Okra or Gumbo. If planted now Peppers and Tomatoes will give a supply to follow the early plantings and to have tomatoes for canning. Have you tried New Zealand Spinach? Don't fail to have some this summer; it continues to grow as fast as you cut it, and you can have it right up to frost.

DWARF BEANS

	By Mail—Postpaid					Not Prepaid			
	½ lb.	Lb.	2 lb.	5 lb.	10 lb.	Lb.	2 lb.	5 lb.	10 lb.
